

**COMPANY: INGRAM BOOK GROUP**  
**INDUSTRY: SPECIALTY WHOLESALE**

## **VOICE-POWERED RESULTS:**

### **OBJECTIVE**

- /// Achieve better DC management by increasing worker productivity, achieving near-perfect order accuracy and improving customer satisfaction.

### **SOLUTION**

- /// Replaced RF scanners with Manhattan's warehouse management system-integrated Vocollect Voice® solution.

### **RESULTS**

- /// Increased productivity and throughput by 25% within six months.
- /// Cut training time in half.
- /// Achieved payback within six months.

### **FUTURE IMPROVEMENTS**

- /// Expand Vocollect Voice to put-away and replenishment applications.

*"We're trying to cut costs out of operations and get distribution faster, more efficient and productive. Warehouse management systems are now commonplace – all of a sudden, that isn't a competitive edge anymore. Now our executives ask, 'What can we do to leverage the warehouse management system?' For us, the answer came in a 'building-block' fashion. First we achieved a great warehouse management system with Manhattan Associates solutions; then, we implemented Vocollect Voice as the next cost-cutting strategy."*

Director, Warehouse Management Systems  
Ingram Book Group

### **Ingram Book 'Talks' Its Way To Supply Chain Savings with Manhattan's Solutions and Vocollect Voice**

Ingram Book Group is the world's largest wholesale distributor of books and audio books to booksellers, librarians and specialty retailers. Great customer service is the cornerstone of Ingram's success; since 1964, the company has provided the book industry with innovations that make doing business easier and more cost-effective.

Ingram was able to move from scanners to voice with confidence in knowing that Manhattan Associates had already developed a fully integrated, real time, direct interface to Vocollect Voice for its i-Series warehouse management system. The entire solution was purchased from Manhattan Associates who, as an authorized Vocollect Voice reseller, also implements and supports it.

## **The Challenge:** **Increase Productivity Without Sacrificing Quality**

Ingram Book Group ships to retailers as well as directly to consumers on behalf of online booksellers. The company stocks 1.4 million different titles (SKUs) in four distribution centers (DCs); order sizes can vary dramatically – from one unit up to 50,000 units. Ingram's complex network of inventory, consumers, distribution channels and facility coordination creates a unique set of supply chain challenges.

Explains Drew Bordas, director of warehouse systems for Ingram Book Group, "With regard to our supply chain, we're experiencing what everyone else is. We're all trying to cut costs out of operations and get distribution faster, more efficient and productive. Warehouse management systems are now commonplace – all of a sudden, that isn't a competitive edge anymore. Now our executives ask, 'What can we do to leverage the warehouse management system?' For us, the answer came in a 'building-block' fashion. First we achieved a great warehouse management system with Manhattan Associates solutions; then, we implemented Vocollect Voice as the next cost-cutting strategy."

## **The Solution:** **Manhattan Associates and Vocollect – Leaders Among the Providers**

Ingram has a keen understanding of the business opportunities and bottom-line benefits available through strategic supply chain management and has implemented a number of Manhattan Associates' solutions in its DCs. Most recently, Ingram introduced Vocollect Voice to guide its more than 70 order selectors to take the most efficient route around the DC.

*"With solutions from Manhattan Associates and the implementation of Vocollect Voice, we have achieved our goal to increase productivity by 25% – while improving quality service to our customers. We're filling orders to booksellers faster."*

### **Drew Bordas**

Director, Warehouse Management Systems  
Ingram Book Group

"Paper, keyboards and RF scanners don't generally fit with the physical nature of a DC worker's job," said Bordas. "That's why we replaced these with voice."

Ingram used a phased approach to implementation and training so that incremental improvements could be made without interrupting service to customers. This was particularly important for the LaVergne facility – Ingram's largest DC – which had the most to gain from voice in terms of order selection productivity, yet the greatest potential for interruption from the implementation process.

"Order selection is crucial for us," said Bordas. "This is such a large payroll department and there is so much walking and time involved in it. We knew voice would enable us to gain widespread financial impact. Yet, we weren't willing to just flip a switch to voice, so we ramped up slowly. But we had a seamless implementation and transition. The time Manhattan Associates invested and its ability to gradually deploy Vocollect Voice allowed us to implement the solutions without service interruption to our customers."

## **The Results:** **Exceeded Productivity Expectations; Achieved Near-Perfect Order Accuracy**

With its innovative solutions in place, Ingram has far exceeded its goal to increase order selection productivity. The initial project return on investment was based on a 10% improvement. A 13.2% improvement was budgeted for 2007 and Ingram is currently at 25% improvement.

This dramatic increase in productivity has been achieved while improving service to Ingram's customers. In fact, Ingram is filling orders to booksellers faster, enabling publishers to more efficiently reach a wider, increasingly diverse customer base. And Ingram's already excellent order accuracy remained consistent as they increased productivity.

Vocollect Voice has also provided important safety benefits as workers are less distracted with equipment and paperwork. An additional bonus is its ability to provide simple, step-by-step instructions for the ultimate on-the-job training experience so new workers learn independently and are productive on their very first day. As such, training time has been cut in half at Ingram.

"Our order selectors have historically been seen as entry-level," said Bordas. "But for the first time ever, we've had people from other departments who want to work in order selection. This is due to Vocollect Voice – it's cutting-edge and our employees think it's cool. In fact, when we take people on tours, you'd think we had 'Star Wars' out there. It's amazing to see the reactions. Worker satisfaction has skyrocketed."
